

# How Do I Find Current Flood Insurance Rate Maps (FIRMs)?

1. Go to <https://msc.fema.gov/portal>.
2. Under the search box in the middle of the page, select the “Search All Products” icon.
3. Select “Idaho” under the Jurisdiction section on the left.
4. Find the appropriate County and Community using the drop down boxes.

5. Click the Blue “Search” icon to view the results.
6. The “Effective Products” tab will then list all the products for the specific community.
7. Select FIRM Panels

8. The Product ID ending with IND (should be the first product) is the map index for the whole selected area as explained in the light gray section above the products.

**Note: As a new index is available, the ending letter A will change to B, therefore, the most current index will contain the highest letter in the alphabet.**

9. Please note that there are more products available in the list of effective products. Older and pending products (FIRMs and LOMCs) are available to view under “Historical Products” and “Pending Products.”
