

# Property Owner Survey on Flood Proofing and Retrofitting Buildings

This survey is intended to help the technical staff responsible for managing flood risks to develop a plan. This floodplain management plan will present the flood risk and the evaluate the tools for reducing the flood risk. Property owner feedback will be captured in the plan. Actions will be developed such that the floodplain management plan will be the playbook for who will be doing what and when to reduce flood risk and make the community more resilient to flooding.

The success of this work to drive down flood risks depends on individual property owners participating in this survey and future meetings. Thanks in advanced for your information...

## \*1. Please provide your address. This will allow the technical staff to assist by grouping sites together.

## 2. Indicate which type of building foundation you have.

- Concrete stem-walls
- Slab-on-grade
- I do not know

## 3. Do you have a walk-out basement?

- Yes
- No
- I don't know

## 4. Please select the tool (or tools) that you're most interest in for managing flood risks on your property. You may select more than one.

- Other (please specify in Comments)

Your Comments

**5. How can the technical staff better assist property owners in managing flood risks?**

**6. Do you have any other comments, questions, or concerns?**

**7. What types of activities would you participate in if they were available in this neighborhood?**

**8. Is a portion of the population more vulnerable than others to flood risks? If so, please describe this vulnerable population group and any suggestions for technical staff to assist.**
